

Gaganpreet Khurana

Full-Stack Software Engineer

India | [linkedin.com/in/g-khurana](https://www.linkedin.com/in/g-khurana) | github.com/GaganpreetKhurana

SUMMARY

SDE-II at Amazon building reliable, large-scale systems end-to-end — backend, cloud, and the interfaces on top — now working hands-on with Generative AI.

EXPERIENCE

Software Development Engineer II

2022 - Present

Amazon

Full-stack work on large, distributed subscription and purchase systems. Promoted from SDE I to SDE-II.

- Own features end-to-end — design, implementation, testing, and launch — coordinating across multiple partner teams to ship customer-facing capabilities on large, distributed systems.
- Design and operate distributed backend services in Java on AWS (Lambda, DynamoDB, S3, SQS, CloudWatch), provisioned as code with AWS CDK, plus React web UIs.
- Built Generative-AI capabilities — integrated LLMs (Amazon Bedrock) into products and authored MCP servers and AI agents adopted by the team.
- Delivered customer-facing Alexa voice and multimodal (APL — Alexa Presentation Language) experiences, plus internal tooling adopted across the team.
- Improved operational excellence: led load & performance testing, optimized CI/CD pipelines, reduced cloud cost, and authored post-incident reviews that prevented repeat issues.

Focus areas: Subscriptions & Purchases · Alexa Skills & Voice · Generative AI · AWS Cloud & Infrastructure · Internationalization · On-call & Service Health

Technology Analyst Intern

Jan 2021 - Jun 2021

JPMorgan Chase & Co.

Built automation tooling that replaced repetitive manual work.

- Built Python and VBA automation — web, email, and PDF scrapers plus MS Office tooling — that replaced repetitive manual workflows and freed analysts for higher-value analysis.

EDUCATION

B.Tech, Computer Science & Engineering

2018 - 2022

Punjab Engineering College (PEC), Chandigarh

CGPA 8.64/10. Executive Body Member, PEC ACM Student Chapter.

SKILLS

Languages: Java, TypeScript, Python, JavaScript, Kotlin, C++, VBA (Visual Basic for Applications)

Backend: REST APIs, Microservices, Distributed Systems, Node.js, System Design

Frontend: React, HTML, CSS

AWS & Cloud: Lambda, DynamoDB, S3, SQS, CloudWatch, AWS CDK (IaC), Docker

Generative AI: LLMs, Amazon Bedrock, MCP servers, AI agents

Alexa: Alexa Skills, APL (Alexa Presentation Language)

Practices: Data Structures & Algorithms, CI/CD, Unit & Integration Testing, Agile

Exploring: Go

PROJECTS

CodeZone [React, Node, Express, MongoDB]

Full-stack platform for programming classrooms — a real-time collaborative code editor, discussion forum, 1:1 chat, and quizzes. My deepest dive into the MERN stack and real-time sync.

Financial Assistant (DONNA) [Python]

An expense-tracking assistant that helps users spend smarter and save more — my most-starred project. Built to practice data modelling and a clean Python UI.

CERTIFICATIONS

- 3 Coursera certifications — Machine Learning, Open-Source/Linux/Git, Front-End frameworks

ACCOMPLISHMENTS

- Rank 2055 in Google Kick Start
- Qualified for Facebook Hacker Cup Round 2
- 5th place — Ultimate Coding Showdown (PEC ACM Student Chapter)
